

Vertical Pick Up Hitch for Telehandler

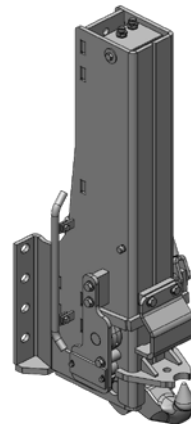

Designed to maximise productivity of your telehandler machine

The hitch is hydraulically operated from the safety of the cab ensuring the connecting procedure is safe and efficient. A patented safety locking system provides easy operation and maintenance.

Suitable for Claas Scorpion, Liebherr

and JCB telehandlers with different wheel sizes.

A sensor monitoring device can be added to the Claas & Liebherr pick up hitch. The system shown is a hydraulic option however manual options are also available on request.
