

## A FRAME QUICK HITCH

### A Frame Quick Hitch Triangle System

The quick hitch triangle system provides a more efficient and safer method of hitching implements and tools to your tractor. A male triangle is permanently fixed to the 3 point linkage system on the rear or front of the tractor while all implements are fitted with a female triangle. The triangles are locked together using a latch mechanism which is safely activated by a handle and cord system connected to the cab.

### A Frame Tractor Attachment (Male)

Part Number	CAT	Load Capacity	Notes
<b>8401A001</b>	2	1400kg	Auto locking and centralised rollers. All pins included. Suits implement attachment # <b>8401A002</b>
